Transit Underwriting Managers (Pty) Ltd offers a variety of value added products to enhance your Goods in Transit Cover.

EXCESS REDUCER

We have the facility to reduce the client's excess, inclusive of the standard excess and the theft and hi jack additional excesses. Inner excess applicable which will be risk profile dependant.

INCORRECT TEMPERATURE SETTINGS

Additional cover for deterioration of stock due to incorrect temperature settings can be purchased. The cover is subject to the policy holder being responsible for setting the temperature. Deterioration of stock due to breakdown and/or malfunction of the refrigeration machinery or ancillary equipment is automatically included in the standard policy.

CONTAMINATION COVER

We offer contamination of stock as an extension as this is excluded from the standard policy. The cover is subject to underwriting approval and will cover the policy holder for contamination of stock whilst in transit.
